

Valoryx

One App. Entire Shop. Online or Offline.

A complete POS & business suite for retail shops, supermarkets, and multi-outlet chains — works online or offline with automatic cloud sync. Billing, stock, transfers, suppliers, staff, and reports, all in one place.

The Problem Shops Face Every Day

Internet Drops = Sales Stop

Most billing apps go silent when the connection drops — and the counter stops with them.

Too Many Tools

Shop owners juggle paper, Excel, and 3–4 different apps for billing, stock, suppliers, and payroll.

Untrustworthy Numbers

Returns, pending payments, and expenses live outside the system — month-end figures are always a guess.

Wrong Fit

Cheap mobile apps are slow on a real counter; full ERPs are heavy, expensive, and hard to learn.

Introducing Valoryx

A single, offline-first platform that runs your entire shop end-to-end — without ever opening Excel.

Works Online or Offline

Run on the cloud or fully offline — bills save instantly and sync automatically both ways, with no data loss.

Every Device, One System

Desktop (Windows/Linux), web, tablet, and mobile — same data everywhere.

Secure by Design

Multi-tenant architecture with fully isolated shop data and role-based access.

ERP-Grade, Shopkeeper-Friendly

Powerful workflows without the complexity, cost, or learning curve of a traditional ERP.

Everything Your Shop Needs

Billing & POS

GST & non-GST invoices, thermal printing, UPI QR with pre-filled amount, barcode scanning.

Pending Bills & Khata

Invoice now, collect later. Partial payments and per-customer credit tracking.

Inventory, Stock & Transfers

Branch-aware stock, branch-to-branch transfers with in-transit tracking, and barcode label printing.

Suppliers & Purchases

Supplier master, delivery notes, auto-numbered purchase orders, one-click stock receipt.

Customers & Payroll

Customer master with loyalty, employee attendance, advances, and payroll with trend charts.

Reports & Dashboard

Real-time sales, profit margins, top products, and peak-hours analytics.

Built for Trust — Security & Reliability

Always Available

Run online or fully offline — the counter keeps billing during outages and syncs automatically when the connection returns.

Blazing Fast

Routes respond in **1-20 ms** vs. 3-9 seconds on always-online competitors.

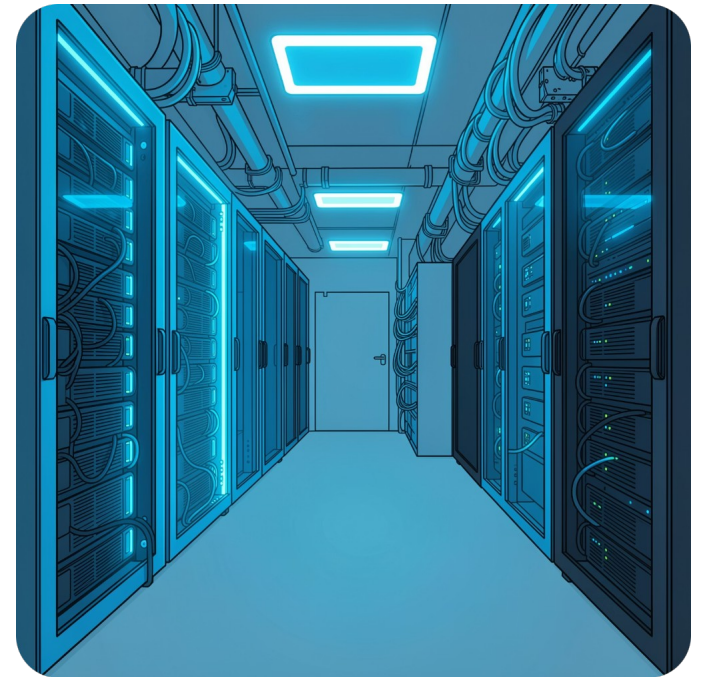

Hardened Security

2FA, IP & session tracking, forced password change, and a security regression test suite.

Full Audit Trail

Every create, update, and delete is logged per shop. Nothing is silently destroyed.

How It Works — 5 Simple Steps

1

Install

One desktop install or open in a browser. Works instantly, online or offline.

2

Set Up

Add products, customers, and suppliers — or import existing data.

3

Sell

Fast counter billing with barcode, UPI QR, and thermal printing.

4

Manage

Stock, suppliers, expenses, staff, and payroll all in one place.

5

Grow

Real-time reports and dashboards turn daily data into better decisions.

The Market — Who This Is For

15M+

Independent Retailers

Single-counter shops and standalone stores across India.

2M+

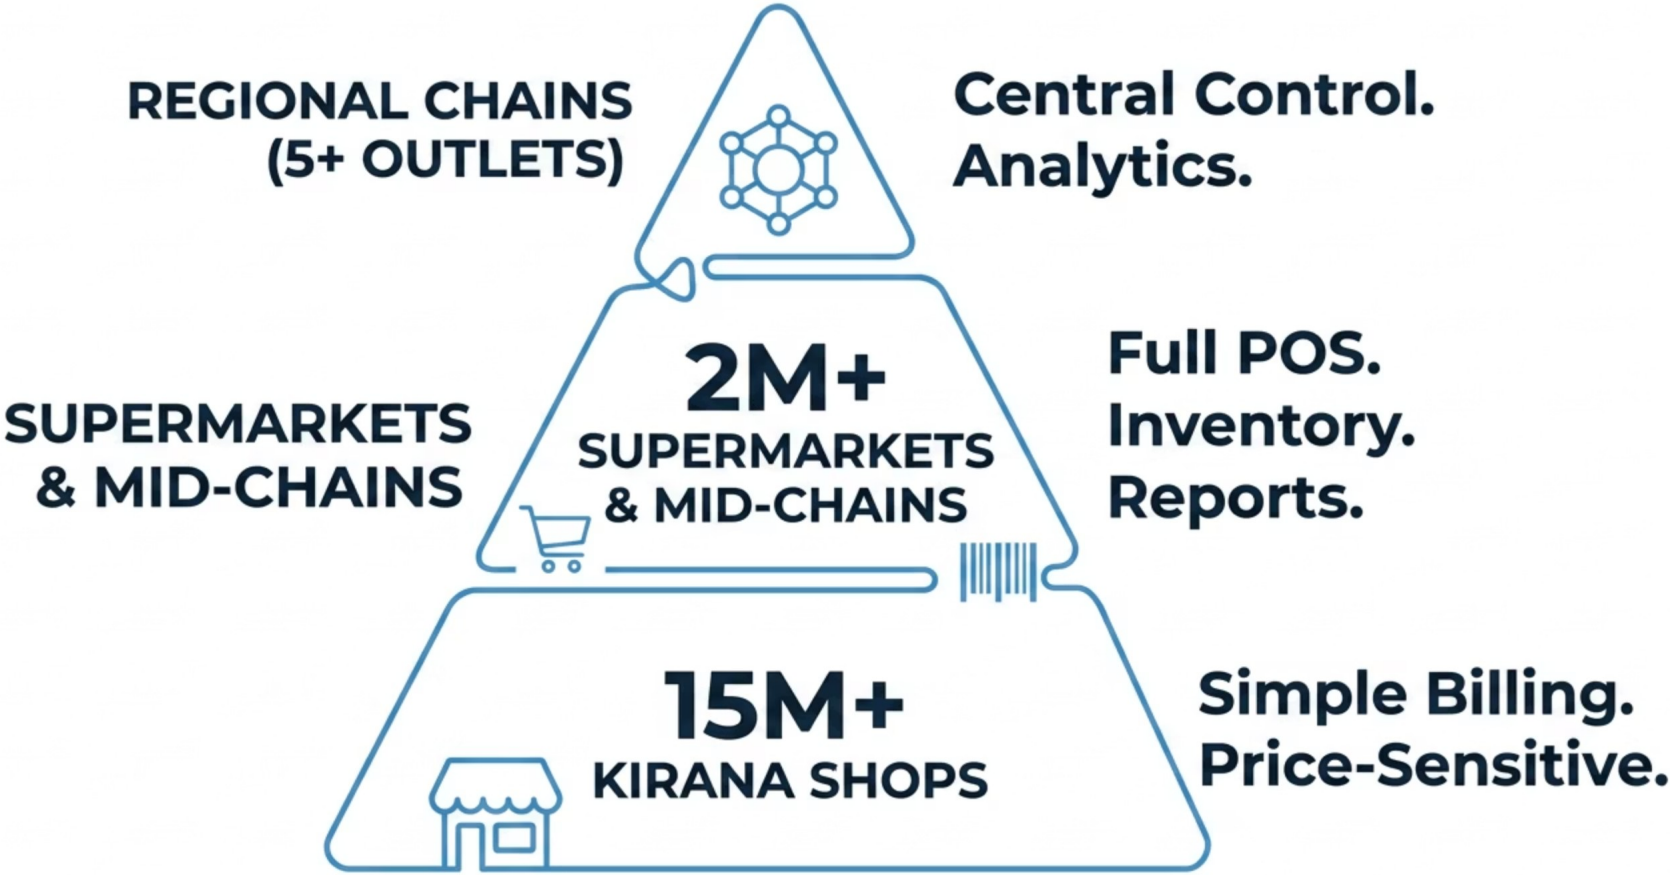

Growing Retail Stores

Multi-counter stores and supermarkets — our primary focus ★

5+

Multi-Outlet Chains

Regional chains needing centralized control across outlets.

India's retail digitization is accelerating — GST compliance, UPI adoption, and the shift away from paper are powerful tailwinds. The sweet spot: businesses that have outgrown a basic billing app but don't want a heavy, complex ERP.

How We Compare

Valoryx combines the simplicity of a billing app with the depth of an ERP — without the complexity.

Solution	Online + Offline	All-in-One Suite	Fast & Simple
Vyapar / myBillBook	❌ Cloud only	⚠️ Billing only	✅ Simple
Marg ERP / Tally	⚠️ Partial	✅ Yes	❌ Complex
GoFrugal / Ginesys	⚠️ Partial	✅ Yes	⚠️ Heavy
Valoryx ★	✅ Both	✅ Full suite	✅ Fast & easy

✔️ **Our edge: works online or offline, bills in 1–20 ms, and one all-in-one suite — billing, stock, transfers, suppliers, staff, and reports.**

Why Valoryx Wins

Online or Offline

Run on the cloud or fully offline — competitors go dark when the internet drops, Valoryx keeps billing.

One App, Not Four

Billing, stock, suppliers, staff, and reports in one system — not stitched-together tools.

Multi-Branch & Transfers

Move stock between branches with approval and in-transit tracking — built for multi-outlet businesses.

10–100× Faster

1–20 ms response vs 3–9 seconds on always-online apps. The counter never lags.

ERP Depth, Shop Price

Enterprise-grade workflows without the cost, weight, or learning curve of Tally or Marg.

Trust Built-In

Full audit trail, role-based permissions, and 2FA — secure out of the box.

The Value to Your Business

Stop Losing Sales

The counter never goes down — even during an internet outage, every customer still gets billed.

Numbers You Can Trust

Returns, pending payments, and expenses all flow into true, accurate month-end profit.

Less Manual Work

No more paper or Excel reconciliation — one system runs billing, stock, staff, and suppliers.

Lower Risk

A full audit trail and role-based permissions protect against theft and costly mistakes.

Scales With You

Start with one counter and grow to multiple outlets — all on the same system.

From a single counter to a multi-outlet chain, Valoryx grows with your business — not against it.

Run Your Shop From Anywhere

Pocket POS

Bill customers from a phone or tablet — perfect for the counter, the aisle, or a pop-up stall.

Built for Touch

A fast, finger-friendly layout designed for small screens — not a shrunk-down desktop.

Offline on Mobile Too

Keep billing on your phone with no signal; everything syncs the moment you're back online.

Same Data Everywhere

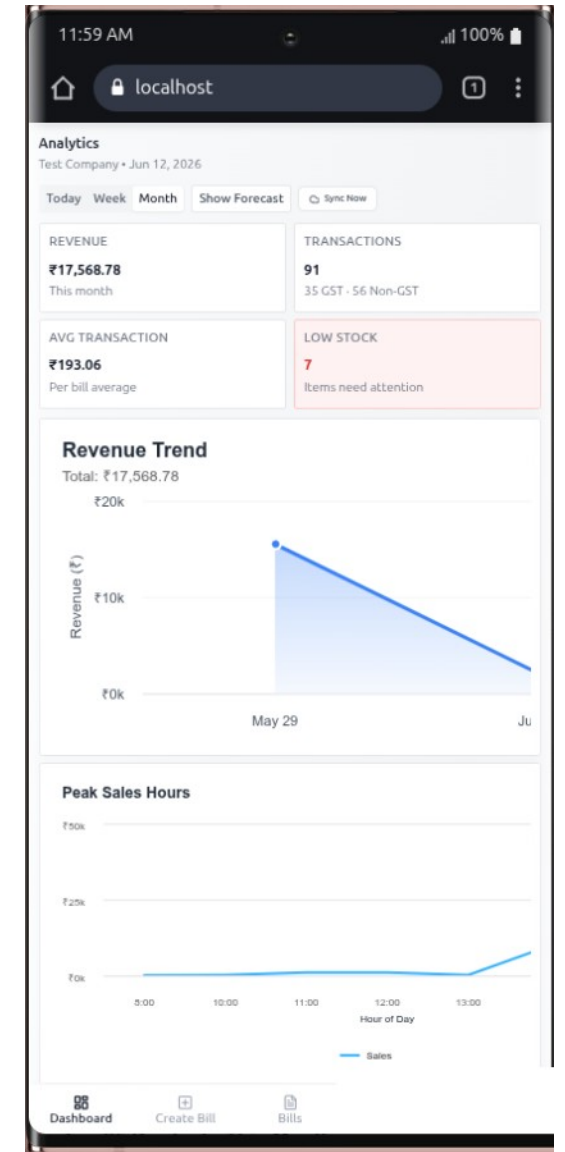

Start a bill on desktop and finish it on mobile — every device stays in sync, automatically.

Manage On the Go

Check sales, stock, and reports from anywhere — even when you're away from the shop.

Print & Share Instantly

Thermal-print or share a bill on WhatsApp straight from your mobile in one tap.

Turn Shoppers Into Regulars

Membership Cards

Enrol customers into a loyalty program that gives them a reason to keep coming back.

Tiers & Rewards

Recognise your best customers with higher tiers and perks they actually value.

More Repeat Business

Loyalty turns one-time buyers into regulars and quietly lifts your average sale.

Points on Every Bill

Customers earn points automatically as they shop — no extra steps at the counter.

Redeem at Checkout

Points come straight off the next bill — a reward customers can see and feel instantly.

Know Your Customers

Every membership is linked to its bills, so you always see who your top customers are.

Our Roadmap — Path to 200 Customers

A phased go-to-market plan, from first pilots to 200 paying shops.

Phase 1 • Validate (Now)

5 pilot shops at 50% off — collect testimonials and real case studies.

Phase 2 • Soft Launch

Free tier goes live; direct outreach to 100 shops across 2 cities.

Phase 3 • Scale

Full pricing, field sales, and referrals → 200 paying customers in 6 months.

Next • Product Roadmap

Deeper multi-outlet analytics, e-way bill support, and a polished mobile app.

Valoryx at a Glance

1–20 ms

Billing Speed

Every bill saves instantly — even fully offline.

100%

Works Offline

Keep selling with no internet; data syncs automatically.

8+
